

Homebuyer University My Home Shopping Tracker

It's important to take notes of the different homes you view and are considering. Use this tracker to keep your notes in one place. Most of this should be filled out during a home viewing but some can be filled out before or after the visit. Feel free to skip any lines that are not important to you, or add any other categories using the "other" rows or "additional notes" section. Make as many copies of this tracker as needed.
